

Bolton Safeguarding Children Partnership—Multi-agency Training

Parental Substance Misuse

Level — Advanced

Information

The training aims to raise awareness of substance misuse; enable earlier intervention and develop workers' knowledge and skills to identify concerns about young people's substance use/misuse. The training will enable professionals and those working with families and provide information on how they can access services.

Objectives

- Identify effects of maternal substance misuse on foetal development
- Explore the impact of parental substance misuse
- Understand the impact of substance use on ability to parent
- Explore how children and young people cope with PSM
- Using genograms when working with families
- Consider issues in families where there is significant PSM
- Explore approaches to working with families
